## اختبار الفصل الثَّاني

# Part One: Reading Comprehension (15 pts)
## -Read the text carefully then do the activities:

   I think that banning junk food adverts would not solve the problem of children's obesity. I do agree that regular exposure of junk food, showing kids these options are available is definitely a contributor to obesity but is not the sole reason. Although many people do not like to hear it, we are responsible for our own health and parents are responsible for what they feed their children until **they** are old enough to make their own choices. We need to educate our society on nutrition and drill **it** in people's heads that junk food is only a sometimes food. Banning junk food would also be increasingly complicated and may cause controversy as people have the right to choose what they consume and junk food is not considered illegal.

   Moreover, it would be very difficult to ban junk food advertising because it is very hard to define what is deemed unhealthy. Some burgers are considered to be fast food but extensive efforts have been made to make **them** healthier with100٪ beef from grain fed cows with no hormones added. Would that still be considered junk food? I believe that banning junk food advertisements is nothing more than a misplaced effort. Efforts should rather be spent on public safety announcements or education campaigns so children will be able to make firm decisions regarding **their** food choices.
