امتحان البكالوريا التجريبي

على المترشح أن يختار أحد الموضوعين التاليين
الموضوع الأول

Part one: Reading and Interpreting (15 Pts)

Read the text carefully, then do the activities below.

Ethics means a set of moral principles which govern a person's behavior or how the activity is conducted. Advertising means a mode of communication between a seller and a buyer. Thus, ethics in advertising means a set of well defined principles which govern the ways of communication taking place between the seller and the buyer. Ethics is the most important feature of the advertising industry. Though there are many benefits of advertising, there are then some points which don't match the ethical norms of advertising.

Nowadays, ads are more exaggerated and a lot of puffing issued. It seems like the advertisers lack knowledge of ethical norms and principles. They just don't understand and are unable to decide what is correct and what is wrong.

The main interest of advertisers is to increase their sales, gain more and more customers, and increase the demand for the product by presenting a well decorated and colorful ad. They claim that their product is the best, having unique qualities than the competitors, more cost effective, and more beneficial. But most of these ads are found to be fake, misleading customers and unethical. The best example of these types of ads is the one which shows evening snacks for the kids, they use coloring and gluing to make the product look glossy and attractive to the consumers who are watching the ads on television and convince them to buy the product with outgiving a second thought.

From the Net

A/ Comprehension: (8Pts)

1) Write the letter which corresponds to the right answer.

- A) Advertising is a form of communication between.....

- Be professional: polite, respectful, fair, ethical.....

Topic B: A lot of children are exploited all over the world in hazardous works.

In a short composition, say what should be done to fight this unethical practice.

Part one: Reading and interpreting (15 Pts)

Read the passage carefully then do the activities.

Almost every day we see something in the paper or on Tv screens about the latest exciting development in the space race. Photographs are regularly flashed to the earth from millions of miles away. They are seen as a visible proof of man's new achievements and successes.

We often told that such achievements will be utilised to make life better on earth. But what has the space race done to relieve the suffering of the earth's starving millions?

The space race is just an extension of the race for power on earth. Only the wealthiest nations can compete and they do so in the name of pure scientific research. But in reality; all they are interested in is power and prestige.

Poverty, hunger, disease and war are man's greatest enemies and the world would be infinitely better if the powerful nations devoted half as much money and efforts to these problems as they do to the space race. For the first time in history, man has the overwhelming technological resources to combat human suffering, yet he spends them on meaningless pursuits.

If a man deprived himself and his family of food in order to buy a car, we would consider him mad. Individuals with limited budgets usually get their priorities right: they provide themselves with necessities before trying to obtain luxuries. Why can't great nations act in the same sensible way? Let us put our house in order first and let the space look after itself.

A/ Comprehension: (8Pts)

1- The reading passage is:

- a) Descriptive. b) Expository. c) Argumentative.

2) Are these statements true or false according to the text?

- a) The media inform us about space achievements.
b) Space research has made life better on earth.
c) Most world countries are participating in space research.
